Qualified Eng. Heinz Schmersal and Ind. Qualified Eng. Philip Schmersal Partner-managers of K.A. Schmersal GmbH \& Co. KG

How does one present a portfolio of more than 25,000 different products and services to a new customer or interrested engineer?
It's a challenge four our sales consultants when they present our company, produtcts and services.

The purpose of this catalog is provide na overview of what we have to offer. We present the company and each product group, with which, we have been developing increasingly comprehensive solutions in safety in equipment in the recente years. One area that is increasingly more importante is that of the qualified services we offer, with which we follow the same central goal as with our products and solutions: working with the custumer to develop innovative solutions in safety, thereby making the world a safe place.

K.A. Schmersal GmbH \& Co. KG

■ Established: 1945

- Employees: approx. 600

Highlights

- Schmersal Group central headquarters
- Development and manufacture of switching devices and systems for safety, automation, and elevator technology
- Licensed testing laboratory
- Pre-development and research center
- Logistics center of European markets
K.A. Schmersal GmbH \& Co. KG
- Established: 1952 (1997)
- Employees: approx. 150

Highlights

- Development and manufacture of devices for operating and monitoring safety and command relay modules, as well as devices for protecting against explosion

Safety Control GmbH

- Established: 1994 (2008)

■ Employess: approx. 30
Highlights

- Development and manufacture of optoeletronic componentes for safety and automation

Böhnke + Partner Steuerungssysteme GmbH

- Established: 1991 (2012)
- Employees: approx. 70

Highlights

- Development and manufacture of componentes, controls and remote diagnostic systems for the elevator industry
( )= entry into the Schmersal Group

ACE Schmersal

- Established: 1968 (1974)
- Employees: approx. 350

Highlights

- Development and manufacture of devices for safety, automation, and elevator technology
- Control systems for the South and North American markets

Schmersal Industrial Switchgear Co. Ltd

- Establisched: 1999
- Employees: approx. 150

Highlights

- Development and manufacture of devices for safety, automation, and elevator technology in the Asian market

## Schmersal India Private Limited

■ Established: 2013

- Employees: approx. 30

Highlights

- Development and manufacture of devices for safety, automation, and elevator technology in the Indian market

## Load Break Switches

## Switch Technology

Compact Load Break Switches are developed in accordance with current standards and NR12 requirements, and in compliance with international IEC regulations 60947-1 and 3 . The manufacture and design make these switches compact, safe, and highly reliable, reducing the maintenance frequency. Using modern manufacturing techniques, these switches are made of polyamide, so they have excellent tensile strength and insulation in order to prevent arcing between phases. Moreover, they withstand short-circuit currents in the most severe conditions.

## Features

- Protection against contact with fingers in the energized parts, avoiding electrical shock.
- All contacts are double self-cleaning, ensuring safer activations.
- Option of mounting on the DIN track, with easy installation.
- Different assembly options for a wide array of applications.
- Compact - little space is required for their installation.
- Option of adding auxiliary contacts onto both sides of the switch - ideal for more complex systems.

## Areas of Applications

- Circuit isolator.
- On/off Switches.
- Main Switch.

Control Switch

- Switch for system selectivity.
- Ideal for chemical, food, cement, and other industries.

## Enclosed Switches

The structure of the enclosed switches consists of durable materials designed to withstand various applications, mainly in industrial environments. These switches meet all the requirements in terms of safety, ease of installation and operation, as well as the ability to save space. These switches guarantee the absolute safety of the operator, since they can withstand short-circuits. Boxes with base fastening switches can only be opened with the switch in the OFF position, with the option of locking the mechanism with up to 3 locks, eliminating possible closing of the circuit in the event of local maintenance.

## B19 - Front Mounting Ø 22 mm

| COMPACT LOAD BREAK SWITCHES |  |  |  |

## NHS - Load Break Switches IP67/IP 69K

| COMPACT LOAD BREAK SWITCHES |  |  |  |
| :---: | :---: | :---: | :---: |
| Code | Description | Current (A) | Poles |
| 11929005 | NHSNH40/O.VA-PL | 40 | 3 |
| 119296 | NHSNH63/O.VA-PL | 63 | 3 |

- Product applies mainly to electrical panels, machinery, and equipment in the dairy and frozen food industries, which require constant cleaning with the use of high-pressure jet cleaners.

## Features:

- Protection Class: Front IP 67 / IP69K.
- No sharp edges.
- Integrated seal - water jets up to 100bar.
- High resistance to cleaning agents.
- Front Mouting.

Information and technical descriptions available online at: www.schmersal.net

## MB34 - Rear Mounting

| COMPACT LOAD BREAK SWITCHES |  |  |  |
| :---: | :---: | :---: | :---: |
| Code | Description | Current (A) |  |
| 162002 | LB 225 MB34 YR BASE | 25 | 3 |
| 162004 | LB 240 MB34 YR BASE | 40 | 3 |

## Use

- The auxiliary contact module has 2 contacts, 1 NO and 1NC.
- The NO contact is the early break, late make contact.
- It is used to trigger any auxiliar circuit.

Can be fitted on either side of the Switch.

Detailed information of our line of products are also available on the internet on www.schmersal.net

## Online catalogue

Designers and purchasers of companies who work together with Schmersal Group do not need to keep and update constantly an extensive documentation in paper: they found all information and data required updated daily at the online catalogue on www.schmersal.net

Online documentation available in 13 languages
The offer of online information for our customers is updated permanently. Our product catalogue may be consulted online in 13 different languages. They are available 24 hours a day, not only the technical data of the complete line of products, but also the compliance statements, testing certificates, assembly manuals, and connection instructions can be consulted and downloaded.

## Designers services

Product technical drawings are also filed at the online catalogue - a service targeted specially to the designer. Thus, he/she can download the drawings directly to their CAD system. CAE data for a comfortable electric project creation is available for download on the Internet. In addition, the designer also founds at Schmersal homepage current information about comprehensive subjects - e.g., technical papers on machine safety, as well as notifications about training courses and events. Visit our page!

## Schmersal group

Schmersal corporate group is engaged for a long time with the pursuit of safety solutions in productive process. With the most varied produts, command modules of mechanical actuation and without contact, the greater line of the world in systems and solutions of commutation and safety was created to protect man and machine. Over 1,500 employees in more than 50 countries worldwide work together with our customers for developing innovative solutions and, thus, make the world safier.
Motivated by the vision of a safe work environment, Schmersal group engineers are constantly working for the development of new devices and systems for each imaginable application and requirement of different industries. New safety concepts require new solutions and it is required to integrate new principles of detection and find out new ways for transmiting and evaluating the information provided for this principles. In addition, the increasingly complex standards, rules and directives set related to machine safety also require a change of thinking by the machine manufacturers and users. These are the challenges that Schmersal Group, in partnership with the machine manufacturers, are facing and will continue to face in the future.
